

Lifting cradle Sliding HS (V)

Vertically sliding lifting cradle. Our V-cradle is hydraulically movable in unlimited vertical directions.

Thus the operating range is improved, also due to the compact fitting dimensions of the lifting cradle. The system works on our 2,0 / 3,0 / 5,0 / 7,8 and 8 tonnes lifting cradle (and all L-type cradles).

This HS V Extension can also be used by most of all other manufacturers of lifting cradles.
