

**Off-set platform in light-range construction ET-V-SZ-2000
(expandable up to ET-V-SZ-5000)**

Light-range off-set platform ET-V-SZ-2000

Hydraulic EUROTECHNIK off-set platform, made of aluminium, equipped with an automatic dumping system.

(it is also possible to produce a stronger version of steel).

Optimization of loading capacity due to consequent light-range construction.

Weight of the lightest platform, incl. winch: approximately 750 kgs.

For platforms of an allowed total weight of min. 3.500 kgs.

Also bigger platforms with a loading capacity of up to 5.000 kgs can be used.
